3. Competitor Analysis

Competitor	Strengths	Weaknesses	NavPath Opportunity
Learnyst-hosted courses	Established content, known brand	Generic UI, no mobile-first experience	Superior Flutter UX, offline access
IMS Learning	Wide reach	Not IMU CET-specific	Hyper-niche positioning wins
Unacademy / BYJU's	Brand power	No IMU CET specialisation	Dominate niche search terms

ASO Opportunity: No dominant, dedicated IMU CET app exists on the Play Store. NavPath Academy can own the top-3 ranking for "IMU CET mock test" and "IMU CET 2027" with consistent keyword placement and rating volume.

4. ASO Strategy

1. Title Lock-In: Pin "IMU CET" in the app title permanently -- it is the single highest-conversion keyword in this vertical.
2. Iterative A/B Testing: Test two icon variants (anchor + gradient vs. compass rose) and two feature graphic headlines via Play Store Experiments.
3. Review Velocity: Prompt in-app review requests after first successful mock test completion (peak satisfaction moment).
4. Localisation: Add Hindi metadata strings for wider Tier-2/3 city reach.
5. Update Cadence: Monthly updates mentioning "new mock test questions" in the changelog to signal freshness to the Play algorithm.
6. Rating Target: Achieve 4.5+ rating within 60 days of launch by resolving 1-star reviews publicly within 24 hours.
